

SUPPLY

The MCM Base™ is an assembly of several components which principally consists of a cabinet and a sub-base. The cabinet and sub-base are customarily sold together as a complete MCM assembly. However, each component can be ordered separately. Several options are also available to equip the Base for the desired application. To view the various components, please refer to the [Technical information](#) section.

To order MCM Bases or spare parts for MCM Bases, you should contact one or more of the following Participating Distributors who will also be in a position to offer, with the MCM products, lamp posts for installation on MCM Bases.
